

Additional bracket for mounting the Mounting Plate for RR

HOME > CATEGORIES > MOUNTING SYSTEMS > ADDITIONAL BRACKET FOR MOUNTING THE MOUNTING PLATE FOR RR

It is used for additional support of mounting plate and to reduce vibrations arising from operation of enclosure exposed to dynamic loads generated for example when mounted on a machine or ship. Back bracket WTP-1 is mounted on the minimal possible depth of mounting plate. Side Bracket WBP-1 is mounted on Side Transverse Channel Bar (p. 109). Made of 2 mm thick galvanized steel sheet.

WTP-1 – Back bracket for mounting plate of RR;

WBP-1 – Side bracket for mounting plate of RR.
