

Electrical installation projects

HOME > CATEGORIES > SERVICES > ELECTRICAL INSTALLATION PROJECTS

Radiolex is not only about enclosures and switchboards, its thriving prefabrication department is created by electrical engineers with many years of experience in design and supervision in the electrical and energy industries.

The projects we deal with are:

- one-family houses,
- industrial installations,
- BMS – building management system,
- energy measurement systems,
- lighting installations,
- transformer stations,
- access control systems,
- SSP, SAP - fire alarm system,
- lightning protection installations,
- internal power lines (WLZ),
- SZR - automatic reserve switching systems,
- power connections,
- modernization of existing installations,
- DSO – sound warning system.
