

WRG - Depth adjustment bracket for RSA, SZA

HOME > CATEGORIES > MOUNTING SYSTEMS > WRG - DEPTH ADJUSTMENT BRACKET FOR RSA, SZA

It is used to increase the universality of mounting equipment inside the RSA and SZA enclosure. Before the final choice of the mounting depth of the additional elements, the brackets need to be drilled with M5 threaded holes.

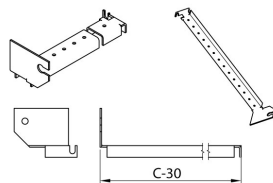

Made of 2 mm thick galvanized steel sheet or stainless steel.

- WRG-ZN - Depth adjustment bracket made of galvanized steel sheet
- WRG-OH - Depth adjustment bracket made of stainless steel 1.4301 (AISI 304)
